

Proposed new wording on “Boat Wash” policy on P 5 of our Policies and Procedures

AIS: In order to prevent the introduction into our lake of Aquatic Invasive Species, the following protocols shall be followed:

1. **Trailer Motorized** vessels shall not be launched into Fallen Leaf Lake unless they and their trailer are bound together by a non-tampered with green (Fallen Leaf specific) seal issued either by a certified inspection/wash station located in the Tahoe Basin or, in the case of vessels which have not been launched anywhere else since removal from Fallen Leaf Lake, by the Fallen Leaf Lake marina staff at the time of last removal from out lake.
2. **Non-motorized vessels (kayaks, canoes, paddleboards, float tubes and the like)** shall not be launched into Fallen Leaf Lake without first being inspected by trained marina staff and determined to be clean, drained and dry. Any such vessels which are damp, unclean or suspicious shall, at the discretion of marina staff, be either turned back to a certified inspection/wash station or hot washed at the marina by trained marina staff prior to launch. There shall be no fee charged for this wash.
